Advantage Secure
MANAGED SECURITY

YOUR USERS, IDENTITIES
AND DEVICES ARE AT RISK.

Modern cyberattacks increasingly target users, identities, email and everyday devices. **Unitec Advantage Secure** is a fully managed security solution that helps protect your business across endpoint, identity and email security.

GET PROTECTED

70% OF SUCCESSFUL CYBER INCIDENTS INVOLVE A USER, IDENTITY, EMAIL ACCOUNT OR DEVICE BEING COMPROMISED.

84%
OF ATTACKS START WITH A PHISHING EMAIL

84%
TARGET USER IDENTITIES AND CLOUD ACCOUNTS

63%
INVOLVE RANSOMWARE, ACCOUNT TAKEOVER OR DATA THEFT

THE THREE PILLARS OF ADVANTAGE SECURE

ENDPOINT PROTECTION
Advanced protection for desktops, laptops and servers, helping detect suspicious activity, ransomware and threats that basic antivirus may miss.

UNITEC IDENTITY PROTECTION
Continuous monitoring of user identities, Microsoft 365 activity and suspicious sign-ins to help detect credential theft, account takeover and identity-based attacks.

UNITEC UNIFIED EMAIL SECURITY
Enhanced protection against phishing, impersonation, malicious links, harmful attachments and business email compromise attempts.

WHY MOST SMALL BUSINESSES STRUGGLE TO STAY PROTECTED

NO SECURITY EXPERT ON STAFF
61% of small businesses have no dedicated cybersecurity person — it often falls to whoever has time.

TOOLS BUILT FOR BIG COMPANIES
Most security software is complex and designed for IT teams — not small business owners.

PAYING FOR FEATURES YOU DON'T NEED
Bloated solutions drive up costs with features that never get used — money better spent elsewhere.

ALERT OVERLOAD
Constant false alarms cause "alert fatigue" — real threats get missed in the noise.

WHAT UNITEC ADVANTAGE SECURE DOES FOR YOU

OUR MANAGED SECURITY SOLUTION HANDLES THE HARD WORK — SO YOU CAN FOCUS ON RUNNING YOUR BUSINESS, NOT MANAGING SOFTWARE.

- ✓ Protects endpoints, user identities and email in one managed security service
- ✓ Helps identify suspicious logins, compromised accounts and credential misuse
- ✓ Supports rapid investigation, containment and response when threats appear
- ✓ Works around the clock — 24/7 security monitoring and peace of mind
- ✓ Detects threats that basic antivirus and standard email filtering can miss
- ✓ Reduces phishing, impersonation and malicious email exposure
- ✓ Improves visibility across devices, cloud accounts and email activity
- ✓ Delivers enterprise-grade protection without adding internal complexity

Unitec ADVANTAGE SECURE MANAGED SECURITY

A fully managed security solution designed for modern businesses.
Endpoint, identity and email protection — monitored and managed around the clock.
