WINNING GROUP

“

The human element is the most common threat vector, and is the **root cause of 74% of data breaches**.

Source: Verizon's DBIR

- Insufficient user training
- Remote working culture
- Lack of policy processes
- Rise of AI threats

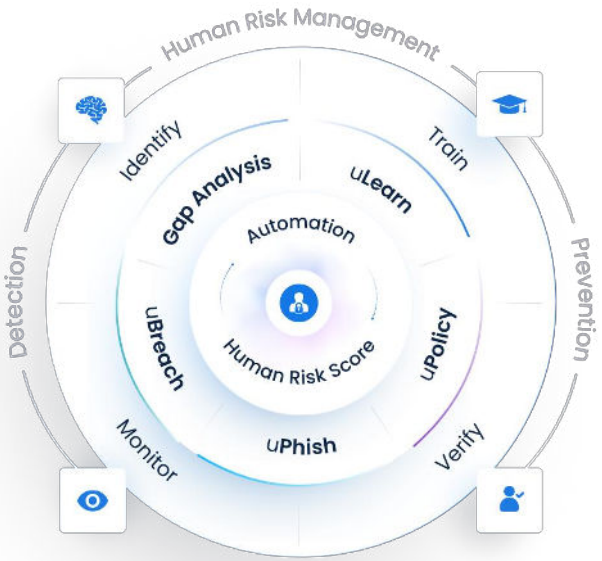
Compliance standards are growing stricter

Global compliance standards are becoming **more and more stringent**

86% of SMBs are not confident they can stay compliant **without external support**

47% of SMBs say they **spend too much time** managing compliance instead of growing their business

How usecure simplifies security training and compliance



Identify – Gap Analysis
Proactively detect security gaps and compliance risks

Train – uLearn / uPolicy
Deliver targeted training aligned with compliance needs

Monitor – uBreach

Continuously track client environments for emerging risks

Verify – uPhish

Evaluate client readiness with realistic security simulations

- End-user awareness & compliance training
- Policy management and signature tracking
- Auditor reporting and breach alerts

Making user training easier through targeted delivery

Evaluate
