KEEPER

ONE VAULT. EVERY PASSWORD. ZERO GUESSWORK.

KEEPER PASSWORD MANAGEMENT

Enterprise password and credential security for every employee

Weak, reused and shared passwords are still one of the easiest ways for attackers to get in. Spreadsheets, sticky notes and browser-saved logins leave your business exposed. Keeper gives every employee a secure, encrypted vault and gives IT full visibility and control, so you can stop credential-based attacks before they start.

WHAT IT DOES	WHY YOU NEED IT
PASSWORD VAULT	Stop risky password reuse
ZERO-KNOWLEDGE ENCRYPTION	Only you hold the keys
SECURE SHARING	Share safely across teams
DARK WEB MONITORING	Spot stolen credentials fast
SSO & MFA INTEGRATION	Simple secure access through MS365 SSO
ADMIN CONSOLE & REPORTING	Enforce policy, prove compliance

WHY PASSWORD SECURITY MATTERS

Stolen and compromised credentials are behind a large share of data breaches. Every new hire, app and cloud service adds more logins to manage. A business password manager enforces strong, unique passwords everywhere, removes risky sharing habits and gives you the audit trail insurers and regulators expect.

TRUSTED. CERTIFIED. PROVEN.

- ZERO-KNOWLEDGE, ZERO-TRUST ARCHITECTURE
- SOC 2 AND ISO 27001 CERTIFIED
- FEDRAMP AND STATERAMP AUTHORISED
- G2 LEADER IN PASSWORD MANAGEMENT
