

XDR MANAGED SECURITY SUITE

COMPREHENSIVE PROTECTION FOR ENDPOINTS, CLOUD, NETWORK & SERVERS

In today's evolving threat landscape, cyberattacks are faster, stealthier, and more damaging than ever. Traditional security solutions can't keep up. That's why we provide a fully managed XDR (Extended Detection & Response) Security Suite, powered by SentinelOne and advanced monitoring, to protect your entire digital environment.

XDR SECURITY – AT A GLANCE

- AI-driven detection to stop malware, ransomware & zero-day threats
- Automated remediation & rollback to recover instantly from attacks
- 24/7 expert monitoring for continuous protection
- Cloud visibility & compliance across AWS, Azure, GCP & SaaS
- Posture management to detect misconfigurations & risks
- Integrated threat intelligence for faster, smarter defense
- Deep packet inspection & anomaly detection to spot hidden threats
- Physical sensor deployment for full network, IoT & OT visibility
- Centralized XDR correlation across endpoint, cloud, network & server
- Server workload & runtime protection against advanced exploits
- Rapid rollback & recovery to safeguard business continuity

WHY CHOOSE OUR XDR BUNDLE?

- Unified protection across endpoints, cloud, network & servers
- Faster detection & automated response with AI-powered XDR
- Expert management 24/7, reducing the burden on your IT team
- Scalable & future-proof security for growing businesses
