VONAHI
SECURITY
A KASEYA COMPANY

TEST, DON'T GUESS

PROTECT YOUR BUSINESS WITH VONAHI PEN TESTING

Continuous security validation for networks and compliance

Traditional penetration testing is expensive, time-consuming and often carried out only once a year. In today's fast-changing threat landscape, that isn't enough. Vonahi's automated penetration testing platform continuously validates your security, helping you find and fix vulnerabilities before attackers can exploit them.

WHAT IT DOES	WHY YOU NEED IT
ATTACK SIMULATION	Think like a hacker
CONTINUOUS TESTING	Stay ahead of threats
REAL-TIME MONITORING	Act before damage is done
VULNERABILITY DISCOVERY	Uncover hidden risks
COMPLIANCE REPORTING	Simplify audits
AUTOMATED ASSESSMENTS	Save time and cost

WHY PEN TESTING MATTERS

Networks change constantly. New devices, software updates, configuration changes and emerging exploits can open security gaps at any time of year. Regular penetration testing keeps checking your security controls and reduces your exposure to evolving threats.

TRUSTED. VALIDATED. PROVEN.

- **27K+ organisations protected**
- **100K+ penetration tests completed**
- **#1 pentesting solution on G2**
- **CREST accredited**
